AUTHOR	Hess, Richard T.; And Others
TITLE	Tucson Bilingual Bicultural Project. Content Analysis Schedule for Bilingual Education Programs.
INSTITUTION	City Univ. of New York, N.Y. Hunter Coll. Bilingual Education Applied Research Unit.
SPONS AGENCY	Office of Education (DHEW), Washington, D.C. Div. of Bilingual Education.
PUB DATE	30 Jun 71
NOTE	35p.
EDRS PRICE	MF-$0.65 HC-$3.29
DESCRIPTORS	Adult Education Programs; *Biculturalism; *Bilingualism; Cognitive Development; *Content Analysis; Curriculum Design; Educational Finance; *English; Learning Theories; Mexican Americans; Pre School Children; Program Costs; Self Esteem; Sociolinguistics; *Spanish; Student Grouping; Tutoring
IDENTIFIERS	*Project BEST; Tucson

ABSTRACT

This content analysis schedule for the Bilingual Bicultural Project of School District 1 of Pima County, Tucson, Arizona, presents information on the history, funding, and scope of the project in its second year. Included are sociolinguistic process variables such as the native and dominant languages of students and their interaction. Information is provided on staff selection and the linguistic background of project teachers. An assessment is made of the duration and extent of the bilingual component, and the methods of second language teaching in general. Included is an analysis of materials, student grouping, tutoring, curriculum patterns, and cognitive development. The report also discusses self-esteem, learning strategies, the bicultural and community components, and means of evaluation. This schedule has been verified by the project. (SK)

Total E-Dom II= II_1 + II_2		120	20%

I Total Non-English Dominant: 480 con't A

II Total English Dominant: 120 con't A

Project does not specify how many English dominant students are Spanish-mother tongue, though it is inferred that some English dominant students are N-EMT.

KEY:	Non-English Dominant N-E Dom N-EMT	English Dominant E-Dom N-EMT
Non-English Mother Tongue	Example: a native Spanish speaker who uses Spanish in most contacts though he may know English	Example: a native Spanish speaker who uses Spanish only in familiar contacts, and English in all others: school, work.
English Mother Tongue	N-E Dom - EMT Example: (rare) a native English speaking Puerto Rican child, born in New York who returns to Puerto Rico and becomes Spanish dominant	E-Dom - EMT Examples: 1)a native E.speaking acculturated American who may or may not know a second lang. 2)a native E. speaking Mexican-American child who has a minimal receptive knowledge of Spanish, but has a Latin culture affiliation

5.2 Cultural or Ethnic identification of target students in program by number and % of each:

Indigenous Americans:		Number	Per Cent of Total Students	if inferred, check (✓)
A1 Navajo	A1	.....	..... %	.....
A2 Cherokee	A2	.....	..... %	.....
A3 Other (specify)	A3	.....	..... %	.....
A TOTAL No. of American Indian	A	.....	..... %	.....
Americans of other ethnic backgrounds:				
B1 Mexican-American	B1	480	80 %	✓
B2 Puerto-Rican	B2	.....	..... %	.....
B3 Cuban	B3	.....	..... %	.....
B4 Other Spanish-American (specify)	B4	.....	..... %	.....
B TOTAL No. of Spanish-speaking Americans	B	.....	..... %	.....
C Portuguese-American	C	.....	..... %	.....
D Franco-American	D	.....	..... %	.....
F Chinese-American	F	.....	..... %	.....
G Eskimo	G	.....	..... %	.....
H Russian	H	.....	..... %	.....
J Other	J	.....	..... %	.....
I TOTAL number of N-EMT target students		480	80 %	✓

Not specified what % of students in project are Mex. American; however, project schools are 78% M-A and Non-English students are 80 of project.

5.3 Ethnic identity of English mother tongue students other than target population, if specified, by number and per cent.

E1 Anglo	E1	120	20 %	✓
E2	E2	.....	..... %	.....
II TOTAL number of EMT students other than target population		120	20 %	✓

5.4 Students' native language or mother tongue if DIFFERENT from their dominant language. 5.4 1

Dominant language	(specify) Different Native Language	Number	Per Cent
1-English	Spanish	NS	NS
2-Spanish	.....	.....	.....

5.5 Students' Dominant Language and Extent of Bilingualism

Dominant language	Number of Monolingual	Number of students Bilingual

B1 Mexican-American	B1 480	80 %	✓
B2 Puerto-Rican	B2	..... %	.....
B3 Cuban	B3	..... %	.....
B4 Other Spanish-American (specify)	B4	..... %	.....
B TOTAL No. of Spanish-speaking Americans	B	..... %	.....
C Portuguese-American	C	..... %	.....
D Franco-American	D	..... %	.....
F Chinese-American	F	..... %	.....
G Eskimo	G	..... %	.....
H Russian	H	..... %	.....
J Other	J	..... %	.....

I TOTAL number of N-EIT target students 480 80 % ✓

Not specified what % of students in project are Mex. American; however, project schools are 78% M-A and Non English students are 80 of project.

5.3 Ethnic identity of English mother tongue students other than target population, if specified, by number and per cent.

E1 Anglo	E1 120	20 %	✓
E2	E2 —	..... %	.....

II TOTAL number of EIT students other than target population 120 20 % ✓

5.4 Students' native language or mother tongue if DIFFERENT from their dominant language. 5.4 1

Dominant language	Different Native Language (specify)	Number	Per Cent
1-English	Spanish	NS	NS
2-Spanish	.....	.....	.....

5.5 Students' Dominant Language and Extent of Bilingualism

	Dominant language of students in program			Number of Monolingual Students			Number of students Bilingual to any extent

Question 6.9

5a

Drachman parents have met seven times during the year in small neighborhood groups to discuss the program. It was their decision to teach their preschool youngsters a dance, skit or rhyme so that they could present a Mother's Day Show. They also prepare food weekly for the classroom.

Measurement In accordance with the evaluation design (Original proposal p. 50) the recorded number of contacts the community representatives have had with the preschool parents through March 1970 are as follows:

	Mission View	Drachman
Classroom	36 weekly	29 weekly
Neighborhood Groups	70 through March 1970	49 through March 1970
Homes	15 weekly	15 weekly
Other	473 through March 1970	100 through March 1970

The percentage of parents of first graders who attended the teacher-parent conferences will be tabulated at the end of the school year, June 1970. As of March 100% of the Mission View parents and 78% of the Drachman parents have attended the conferences.

4. Parents will value the program after they have participated in it for one school year as measured by their responses on an opinionaire.

Measurement The community opinionaire, to be distributed by the community representatives, in May 1970, will ask the parents how they felt about the program, and obtain enrollments for the following year. Their responses will be tallied.

5. Parents will know about the ancillary services available in the community after participation in the program such as: medical and dental care, community facilities and events, and use these services as measured by their responses on an opinionaire.

Measurement A pre-community opinionaire was circulated by the community representatives in August 1969. Two of the questions and the responses were:

___ Check the following community services you or your family use or have used:

	Mission View	Drachman
County Hospital	30	74
Southern Arizona Mental Health		7
Planned Parenthood	30	52
Family Counseling Services		19

Question 7.2

Program Procedures

The proposed bilingual-bicultural program of Tucson Public Schools will involve pre-schoolers three to five years of age, their parents, and first grade students. The program has several features, namely, the development of the language processes in both Spanish and English, the improvement of cognitive functioning, the development of a positive self-concept and the desire for academic achievement, the establishment of effective parent-teacher-school relationships, and the development of a program involving mothers and pre-school children.

It has long been known by educators and psychologists that the language ability and concomitant educational success of students begins at the pre-school level. Bender (1) states that:

> "The earliest identification with mother and her continuous affectional care is necessary during the period of habit training and the rapid development of language and the formation of concepts within the family unit. Otherwise the higher semantic and social development and expansion of the educational capacities does not take place."

Therefore, it is the purpose of this program to directly involve the mothers of pre-school children in their education and to begin that education in the language in which they can best communicate. Concept formation will take place concurrently with the learning of another language.

1. Pre-Schooler

The mother and her three to five-year old children will attend the pre-school once a week. The schedule is as follows:

M T W TH F	9 a.m. - 11 a.m.	five sessions
M T W TH	1 p.m. - 3 p.m.	four sessions

Based on a possible enrollment of 150, there will be approximately 16 children in attendance at each pre-school session. Each session will be grouped whenever possible according to neighborhood so that parents who live near each other will attend pre-school together. They will be called "neighborhood groups."

During the pre-school session the children and their parents will meet with a bilingual teacher and bilingual teacher assistant, a resident of the school area.

Question 7.3

66

Measurement The Van Alstyne was administered to the control group in the manner designated in the evaluation design, (Original proposal p. 47). The results of the pre-test in September and the post-test in May will be compared prior to June 30, 1970.

Second graders at Mission View School, who had taken part in a Bilingual Bicultural Pilot Program during the 1968-1969 school year, were eliminated from the control group.

The teacher-made tests have not yet been designed, however, the specific student performances from which their tests will be designed, appear in Appendix B, 1 & 2. The actual tests will be constructed at the summer workshop and administered at the beginning and end of the school year in order to measure student progression.

Procedure The first graders are communicated with in the language they best understand whether it be Spanish or English. This is possible because all of the teachers are bilingual except one and all of the teacher assistants are bilingual. The teacher who is not bilingual relies on her teacher assistant and student teacher to further communicate to those children who best understand Spanish, and team teaches with a bilingual teacher. The first grader's vocabulary lessons begin where he is and are then extended to include and expand both languages. The specific performances, methods and materials are included in Appendix B, Behavioral Objectives 1 & 2.

Measurement According to the evaluation design (original proposal, p. 45) the Van Alstyne post test will be administered to the experimental group upon their entrance into second grade. It will also be administered in May 1970 to measure the progression made.

2. The first graders will receive a more efficient intellectual base for second grade after participating in the program than a comparable control group as measured by the Lorge Thorndike. The intellectual base includes identifying, time orientation, listening, recall, following directions, numerical and ordinal concept formation, and discrimination of change process. The progression of the first graders will be measured by teacher-made tests.

Question 7.6

The Program Director will be the link between the administrative staff and the program staff. Her duties will be to keep the program personnel informed of school policy, and communicate the progress of the program to other administrators.

The Program Coordinator will be bilingual, certified elementary school teacher with at least three years teaching experience and a background in early childhood education. This position will be publicized through Tucson Public Schools weekly bulletins. Her specific objectives are as follows:

1. Will be responsible for the coordination of all components and phases of the Bilingual-Bicultural Program.

2. Will attend planning meetings and actively participate through the exchange of ideas.

3. Will communicate the program objectives to the community representatives.

4. Will help the teacher write behavioral objectives for their students and coordinate them with the program objectives.

5. Will act as resource person in describing and providing data on a variety of teaching methods that will help to fulfill the objectives and meet the teachers' needs.

6. Will act as a resource person by describing and providing instructional materials that will help to fulfill the objectives and meet the teachers' needs.

7. Will act as a resource person by providing data for measurement and evaluation, and by participating in the selection and construction of methods of measurement.

8. Will be responsible for the dissemination of information regarding the Bilingual-Bicultural Program.

9. Will participate in in-service training such as Teacher Self-Appraisal along with program teachers throughout the school year.

10. Will communicate the objectives of the program to the community representatives.

The Pre-School Teachers will be bilingual, certified teachers with a background in early childhood education. Their basic duties will be unique from the other teachers because most of their time will be spent on helping parents to learn how to educate their children. These positions will be publicized through Tucson Public

Question 8.2

IN-SERVICE TRAINING

All of the teachers currently teaching in the Bilingual-Bicultural Program have enrolled in the Teacher Self-Appraisal (TSA) In-Service Program. TSA is an in-service program in which the teacher (or administrator) learns to evaluate his own behavior and the effect and significance of his behavior upon children in the classroom. The participants spend 60 hours - 45 hours of class time and 15 hours of individual work and viewing time during the year. The TSA program provides for (1) weekly in-service group meetings, (2) video taping of the teacher in the classroom, and (3) individual work and viewing time.

In the in-service meetings the teacher will study in the areas of the (1) rationale for self-appraisal, rather than external evaluation, (2) instructional objectives, and (3) research on teacher-pupil interaction and systems of analyzing teacher behavior.

Other in-service training will include improving the Spanish of the teacher and teacher assistant.

From time to time during the school year consultants will be used in the areas of methodology, early childhood education, Mexican-American culture, testing and evaluation, English as a second language, and parent involvement. The amount of $580. has been budgeted to obtain local and out-of-town consultants for this purpose.

Details for next year's In-Service Training will be provided after the Pre-Service Summer Workshop.

8.3 Methods of Teacher Training: (Mark all that apply) 8.3 3, 4, 14

Question 11.0

I. ABSTRACT

The major purposes of this proposed program are the development of the language processes in both Spanish and English, improvement of cognitive functioning, the development of a positive self-concept and the desire for academic achievement, the establishment of effective parent-teacher-school relationships, and the development of a program involving mothers, their children, and the community. The first year of the program will include two components: three to five-year old pre-schoolers and first grade students. An addidtional grade level will be added consecutively each year through sixth grade.

The over-all program procedures will include a bilingual representative from the community who will be employed to help link the school and the home. This representative will be directly involved in the planning and implementation of the program in order to assure the fulfillment of the community's educational needs. Through the employment of bilingual teachers and teacher assistants, the language of the child (Spanish or English) will be used to help him develop a sound intellectual base with the concurrent inclusion of another language. This along with the study of both Mexican and American cultures will promote a positive self-concept. The in-service training of the teachers through Teacher Self-Appraisal will also help further the development of a positive self-concept and attitudes towards learning.

The procedures for the pre-school component will include the mothers as the prime educators of their children. At weekly pre-school sessions, the mothers will receive knowledge on child development and learn how to use a variety of educational methods in order to promote the language development and concept formation of their children. They will receive information from the teacher and observe the teacher as she works with the children.

The procedures for the first grade component will include a team of three first grade teachers at each school. Educational concepts will be presented in the mother tongue of the children and independent learning will be stressed. Mothers will be asked to volunteer their assistance in the classroom.

Question 11.0

F. Long Range Program Objectives

1. To provide a bilingual-bicultural program of such intensity so by the time these students complete the sixth grade their achievement level will be at and above the national norm for fifth grade students.

2. To develop a program of such worth and scope that it will be continued as a regular part of the school's educational enterprise after the termination of federal funds.

3. To prepare and develop a staff of bilingual teachers and experts in bilingual education capable of carrying on a worthwhile program and capable of instructing others in bilingual methods.

4. To develop an efficient dissemination of information program at the local, state, and national levels.

5. To develop an evaluation design, procedures, and techniques through the use of outside auditors which will be revelant and suited to the needs of bilingual education.

11.4 The current project will be linked to a future Bilingual Program at the indicated grade level: (indicate specific grade)

12.0 METHODS OF SECOND LANGUAGE TEACHING

(Mark all that apply; some projects may use a combination of methods) 12.0 1

1-Audio-lingual habit skills or behavioral approach. Emphasis on communication. Includes contrastive analysis of sounds (units) in both languages by teacher and students, student repitition of tapes and/or fluent teachers' model sentence patterns until responses are automatic. Structural drills and dialogues are systematically presented. Includes direct association between object and word in second language in a sequence of patterns learned in complete sentences. Inductive-generalizations drawn from examples.

2-Transformational-cognitive approach
Acquiring an understanding of the structural patterns or grammatical rules of a language.

Question 11.14 11a

week by the parent and her children. At this time, the objectives and educational procedures will be specifically planned for the following week. The parent will take an active part in the planning and be encouraged to impart to her youngster the skills she knows best besides learning new skills herself. The basic aim being for her to encourage her child to communicate through the use of language.

In-service training for the pre-school personnel--coordinator, 2 pre-school teachers, 2 teacher assistants, 2 community representatives, and the research assistant will take place every week on Friday morning.

2. Kindergarten children

The five-year-old pre-schoolers will attend school each day. There will be two sessions, 8:30 A.M. - 11:00 A.M., and 12:30 P.M. - 3:00 P.M., to accomodate twenty-five at each session, or 100 five-year-olds at the two schools. Their mothers will not be required to attend school with them but a schedule for mothers on a rotating basis to volunteer their classroom help will be necessary to insure their participation.

The Home Tasks for the kindergarten children and their mothers will be sent home on a bi-weekly basis.

Every other Monday morning, 15 minutes before school begins, the teacher will explain the Home Task to the teacher assistant, the community representative and two mother helpers. They will in turn share the responsibility of providing and explaining the respective Home Task to the mothers. This will be done at the regularly scheduled coffee-klatches held at various homes during the two-week period.

At the end of the two-week period the mother returns the Home Task and records the results on the IBM cards. This will be done the first 5 or 10 minutes of the coffee-klatch conference.

The Community Representative's responsibility is to schedule and monitor all the Home Tasks administered. This task is in addition to her other duties mentioned on p. 132.

The Bilingual Bicultural Program will establish a relationship with the Head Start Program. Mrs. Cecilia Avalos, Head Start Program Assistant, and the Bilingual-Bicultural Project Coordinator will coordinate the activities relevant to three and four-year old children, parent involvement activities and activities having to do with inservice training. Consultants or local resource personnel used by either program will be shared.

2a-inductive -generative approach: through listening to communication, perhaps of peers, and attempting the new language in situations which call for the student to generate sentences - test his understanding. (the way native language is acquired)
Includes direct association between object, picture or action and word in second language.

2b-deductive - the cognitive code approach: through initial formal study and analysis of grammatical structures, then applying them through examples, i.e. answering questions, or transforming affirmative sentences to negative, declarative to interrogative, active to passive.

3-Grammar - Translation Method
Formal study of rules of grammar and translation from first language to second. Emphasis on reading in second language rather than using it for oral communication.

13.0 DOMINANT AND SECOND LANGUAGE SKILLS SEQUENCE

Bus Flow 17.3

Parents will be invited to make appointments for any additional conferences that they may feel they need.

A student progress card will be designed to conform with the objectives. They will be distributed immediately preceding the teacher-parent conference.

Individualization of instruction will be carried out as follows:

1. Children will be assigned to classrooms heterogenously.
2. Teachers in grade one will begin diagnostic work immediately to determine individual academic and language deficiencies, and levels of ability.
3. Teachers in grade two will do as above. They will also have available to them past records.
4. Children within classrooms will be grouped by levels of ability for the different subject matter areas for small group activities. These groups will remain flexible so as to allow children to advance to a more difficult level.
5. As a result of teacher teaming and provision for interest centers, small groups of children will work at scheduled interest centers during periods of the day. Individualized help will be given to these groups at the interest centers by teachers, teacher assistants, parent helpers or student helpers.
6. Individual help will be given to each child by a teacher or teacher assistant when necessary.

B. Time sequence flow charts for preliminary and planned procedures are on the following two pages.

Question 18.2

in Spanish will be taught one-third of the time at various times of the day. This instruction will be in a variety of content areas, thus avoiding language teaching isolated from the content of the total curriculum. This will allow the students to utilize past knowledge and experience through the one medium which allows the fullest amount of communication, namely the mother tongue of a majority of the students. This will also provide an opportunity for the non-Spanish speaking members of the class to become bilingual and bicultural.

The bilingual teacher assistant will work with the children in their small study groups throughout the day. She will communicate with the children in both Spanish and English. She will reinforce the Spanish and English taught during the lesson.

Time is allowed at the end of each day for the teacher and teacher assistant to evaluate the recorded daily activities in light of their behavioral objectives and the recorded behavioral outcomes. The objectives and activities for the following day will then be specifically planned in light of this evaluation and the weekly objectives. The teacher will help design checklists to aid in this self-monitoring system so that it will be quick, consistent, and meet their needs.

Parents will be asked to volunteer their assistance in the classroom. They will be able to observe, offer ideas, help with curriculum planning, and assist with daily activities. A rotating but flexible schedule will be planned so that each parent can participate in the classroom activities for approximately a week at a time or whenever it is convenient for the parent.

The community representatives are the link between the home and the school. She will communicate to the parents the ancillary services available in the community so that they may be used to fulfill their needs, such as: medical services, library services, playgrounds, community events, and make sure they know how to avail themselves of these services. She will encourage the parents to enroll in an adult education course in their area. She will participate in the instructional activities in the classroom.

Teacher-parent conferences will be scheduled every nine weeks as provided by school district policy.

18.3 Parent tutoring: (mark all that apply) 18.3 2, 6, 7

no-not mentioned
0-type not specified
1-inter-ethnic parent tutoring is used
(2)-intra-ethnic parent tutoring is used

Parents are trained to become tutors for their children:
3-in the home by a home-visiting teacher
4-in an adult education component
5-in school through observation and guidance of teacher
(6)-as parent volunteers who tutor during the school day
(7)-materials are provided for use in home by parents
8-other (specify)

19.0 CURRICULUM PATTERNS 19.0 4, 5

The stated curriculum pattern of the bilingual project:
1-Except for inclusion of N-EMT instruction the curriculum is otherwise typical or regular, for this state.
There are other modifications whithin the curriculum of the bilingual program which differ from traditional, typical curriculum such as: (mark all that apply)
2-a non-graded classroom: pupils of different ages are grouped together during part of the school day
3-flexible or modular scheduling
(4)-small group instruction
(5)-individualized learning
6-open classroom
7-guided discovery and inquiry
8-a curriculum which is both child and subject-centered
9-others (specify)
10-if the program includes activities which complement experiences children encounter in the home, community and through mass media i.e. TV, describe below:

20.0 COGNITIVE DEVELOPMENT

20.2 Cognitive development in later grades (grade 4 and above) 20.2 N.A.
0-method not mentioned
1-specify or xerox p. no. and document
n.a.-no grade 4 or later grades

Question 20.0 16a

Measurement The Van Alstyne was administered to the control group in the manner designated in the evaluation design, (Original proposal p. 47). The results of the pre-test in September and the post-test in May will be compared prior to June 30, 1970.

Second graders at Mission View School, who had taken part in a Bilingual Bicultural Pilot Program during the 1968-1969 school year, were eliminated from the control group.

The teacher-made tests have not yet been designed, however, the specific student performances from which their tests will be designed, appear in Appendix B, 1 & 2. The actual tests will be constructed at the summer workshop and administered at the beginning and end of the school year in order to measure student progression.

Procedure The first graders are communicated with in the language they best understand whether it be Spanish or English. This is possible because all of the teachers are bilingual except one and all of the teacher assistants are bilingual. The teacher who is not bilingual relies on her teacher assistant and student teacher to further communicate to those children who best understand Spanish, and team teaches with a bilingual teacher. The first grader's vocabulary lessons begin where he is and are then extended to include and expand both languages. The specific performances, methods and materials are included in Appendix B, Behavioral Objectives 1 & 2.

Measurement According to the evaluation design (original proposal, p. 45) the Van Alstyne post test will be administered to the experimental group upon their entrance into second grade. It will also be administered in May 1970 to measure the progression made.

Question 20.1

2. The first graders will receive a more efficient intellectual base for second grade after participating in the program than a comparable control group as measured by the Lorge Thorndike. The intellectual base includes identifying, time orientation, listening, recall, following directions, numerical and ordinal concept formation, and discrimination of change process. The progression of the first graders will be measured by teacher-made tests.

21.0 SELF-ESTEEM: 21.0 7, 12

Stated methods of project compenent expected to increase self-esteem:
no-self-esteem not mentioned as an objective
0-self-esteem is an objective but methods not specified
Teacher encourages pupil to verbally express his feelings:
1-through role-playing
2-puppetry
3-language-experience approach: students dictate stories from their own experience
4-teacher accepts, acknowledges ideas and feelings
5-teacher encourages non-verbal expression of child's feelings through painting, music, dancing
6-teacher provides experiences in which the various ways that children act are accepted by the teacher; their actions are discussed and the children are encouraged not to make fun of "different" ways
(7)-teacher provides experiences leading to competency and success
8-teacher provides experiences where occasional failure is acknowledged as part of everyone's experience; second attempts are encouraged
9-other (specify) (xerox or summarize) document page #

Teacher provides experiences in pupil self-direction and acceptance of responsibility, such as:
10-pupils act as tutors for other pupils
11-puils have some options in choice of curriculum
(12)-pupils choose activities from a variety of interest centers
13-older puils participate in curriculum planning and/or development
14-pupils write a bilingual newspaper for dissemination to the community
15-other (specify)

22.0 LEARNING STRATEGIES 22.0 1

1-The project mentions the following specific learning strategies as important for reaching a particular ethno-linguistic group:
(specify or xerox) Document and Page no.
Example: Navajo children resist participation in an authoritarian, traditional classroom. An open classroom where teacher participates rather than directs all activities and students or groups of students initiate activites, move about freely or sit in a circle or horseshoe rather than sit in rows, has been found more effective.
0-none mentioned

1) see p. 9a + 11a - involvement of Mothers as prime educators for pre-school + Kindergarten students. mothers learn educational methods + are

4-home visits by school personnel
5-other (specify)
0-method not specified

24.6 The school is open to the community through: 24.6 2

0-not mentioned
no-school is not open to community for community use
1-opening school facilities to the community at large for use after school hours and on weekends
2-providing adult education courses
3-other (specify)

25.0 IMPACT EVALUATION

25.1 Project mentions description or dissemination of the bilingual program through: 25.1 1,2,3,6,7

1-newspaper articles
2-radio programs
3-TV programs
4-video-tapes
5-films
6-visitors to observe the program
7- slide sequence and project booklet

Pg 23 Final Eval.

Question 25.2

I. GENERAL STATUS OF THE PROJECT

The Bilingual-Bicultural Project was well received in the schools and communities in which it was implemented this first year. Through on-site conversations with project personnel, a high degree of enthusiasm and commitment to the total project goals was evident. Many of the project teachers, aides, and community representatives were eager to work "late hours" in their planning for project activities. Other teachers in the schools (not directly associated with the Bilingual-Bicultural Project) expressed interest in the activities, materials, and methods being developed within the project--hopefully, that they might make their own classroom experiences more meaningful for the bilingual student. School administrators were proud of the project and expressed a great deal of in-depth knowledge regarding the daily activities of the project as they guided visitors through the classrooms. Parents and community personnel expressed that they felt this project was "very helpful," taking into consideration their needs and problems in the planning of meetings and activities. In general, the auditors found very positive attitudes regarding the project and its activities.

However, the first year of implementation of the project was not without problems, both major and minor, which kept the project from achieving even more success. These problems have been discussed and tentative solutions have been incorporated into the continuation proposal which will be reviewed in the Critique Report, 1970-71.

25.2 Project's impact: 25.2 1

1-Project mentions that other classes in the school, but not in the program have picked up methods or material from the bilingual program
2-Project mentions other schools in the local educational system have started bilingual programs
(3)-Project mentions that a University has instituted teacher training courses in bilingual education to meet staff development needs

Pg 3 Final Audit '70

26.0 ROLE OF EVALUATOR

26.1 Evaluator has field tested, on a group of children who are of the same language, culture and grade levels as the children in the bilingual program: 26.1 0

0-not mentioned
1-published measures
2-staff developed measures
3-staff translations of published measures
4-staff adaptations of published measures

Project attempted to find a control group but did not

26.2 Evaluator has personally observed students in the program: 26.2 1

0-not mentioned
no-never
(1)-once or twice during the year
2-more than twice
3-regularly
4-other (specify)

26.3 Evaluator has met with teachers: 26.3 2

0-not mentioned
no-never
1-once or twice during year
(2)-more than twice
3-regularly
4-other (specify)

27.0 EVALUATION PROCEDURE

27.1 0-not specified 27.1 3
1-A comparison group has been chosen
2-A comparison group will be chosen
(3)-A comparison group has not been chosen

27.2 0-not specified (mark all that apply) 27.2 1, 3
(1)-Pre-tests have been given to project group or sample
2- " will be " "
(3)-Post-tests have been given to project group or sample
4- " will be " "
5-Pre-tests have been given to comparison group
6- " will be " "
7-Post-tests have been given to comparison group
8- " will be " "
